Workflow and system context

Bently Nevada 330903-00-11-10-01-CN is an evidence-bounded requested 3300 XL NSv metric probe configuration. System role: It is a requested M8xl, no-armor NSv probe configuration whose final market/order suffix requires nameplate or Baker Hughes order-record confirmation.

01	System Inputs: It is a requested M8xl, no-armor NSv probe configuration whose final market/order suffix requires nameplate or Baker Hughes order-record confirmation.
02	Processing: Use only after confirming the complete label, matching NSv extension cable and Proximitor sensor system length.

Published context and boundaries

01	Verify the complete Bently Nevada 330903-00-11-10-01-CN physical label and installed-system documentation before use.
02	Do not treat CN as equivalent to official approval options 00 or 05 and do not copy data from neighboring 330903 configurations.
03	Origin and HS code remain unpublished unless an exact manufacturer record or the physical package label establishes them.

Verification and release checks

01	Verify the complete Bently Nevada 330903-00-11-10-01-CN label, revision and installed-system documentation before use.
02	Do not treat CN as equivalent to official approval options 00 or 05 and do not copy data from neighboring 330903 configurations.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, drive, network and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.
