DSMB178 IN5730-1001-Y

ABB Memory Board

Supplier-compiled technical summary. Not an ABB-issued datasheet.

Base type	DSMB 178
Board label shown	57360001-MM / PR:01
Documented role	1 MB PROM
CPU context	DSPC 172 / 172H

System classification

ABB catalogue: Advant OCS with Master SW; MasterPiece 200 and 200/1 Central Units. The cited MasterGate 230/1 example describes the base module's PROM role.

Technical reference

ABB Automation 3BSE002142R1, section 2.2, page 5: one DSMB 178 PROM module of 1 MB in the described CPU assembly. This is distinct from the assembly's RWM.

Replacement review

Confirm CPU assembly, board revision and programmed PROM contents. The IN5730-1001-Y listing suffix has no verified ABB equivalence or firmware mapping in the reviewed material.
