

INDUSTRIAL MACHINERY MONITORING PRODUCT

86691-00750-0435-15

Industrial Monitoring Component

Bently Nevada 86691-00750-0435-15 is an industrial monitoring component identified by the complete order code shown on the installed item and service record.

| IDENTITY          | VERIFIED VALUE                     |
|-------------------|------------------------------------|
| Manufacturer      | Bently Nevada                      |
| Product           | Industrial Monitoring Component    |
| Model             | 86691-00750-0435-15                |
| Family            | Bently Nevada machinery monitoring |
| Country of origin | USA                                |

DOCUMENT SCOPE

Exact model identity, supported configuration data, installation checks, applications, precautions and controlled acceptance records.

MODEL-SPECIFIC ENGINEERING NOTE

Record the full 86691-00750-0435-15 marking, installed position, mating hardware, cable and termination details before disturbance. Obtain Bently Nevada confirmation before substitution or recommissioning.

# Verified Product Record

| PARAMETER      | VERIFIED VALUE      |
|----------------|---------------------|
| Manufacturer   | Bently Nevada       |
| Order identity | 86691-00750-0435-15 |

## Installation Boundary

ENGINEERING BOUNDARY

Record the full 86691-00750-0435-15 marking, installed position, mating hardware, cable and termination details before disturbance. Obtain Bently Nevada confirmation before substitution or recommissioning.

| CHECK                 | REQUIRED RECORD                                  |
|-----------------------|--------------------------------------------------|
| Identity              | 86691-00750-0435-15                              |
| Installed arrangement | Position, mating hardware, cable and termination |
| Configuration         | Associated module or monitor channel             |
| Acceptance            | Diagnostics and controlled functional proof      |

SOURCE BOUNDARY

Baker Hughes / Bently Nevada product support. Apply only the exact ordering-code values shown in this document and verify the installed marking before work.

# System Role and Verification

Bently Nevada 86691-00750-0435-15 is an industrial monitoring component identified by the complete order code shown on the installed item and service record.

**IDENTITY**

Record 86691-00750-0435-15 from the physical marking.

**INTERFACE**

Document every mating part, connector and cable before disturbance.

**CONFIGURATION**

Confirm the associated system and channel using manufacturer records.

**ACCEPTANCE**

Restore the documented arrangement and prove operation before release.

## Controlled Installation Checklist

| NO. | CHECK                                                                                        |
|-----|----------------------------------------------------------------------------------------------|
| 1   | Verify 86691-00750-0435-15 from the physical marking before work.                            |
| 2   | Do not infer dimensions, electrical values or approvals from a nearby model.                 |
| 3   | Photograph and record the installed position and mating hardware before removal.             |
| 4   | Label every conductor, connector and cable route before disconnection.                       |
| 5   | Ask Bently Nevada support to confirm any proposed replacement or compatibility claim.        |
| 6   | Restore the documented arrangement and complete a controlled functional test before release. |

# Applications and Model-Specific FAQ

**INSTALLED-BASE MAINTENANCE**

Maintains a controlled record for the exact installed order identity.

**PLANNED REPLACEMENT VERIFICATION**

Supports manufacturer confirmation before any substitute is accepted.

**OUTAGE INSPECTION RECORDS**

Captures mounting, cabling and termination evidence before disturbance.

**CONTROLLED RECOMMISSIONING**

Links restored identity and connections to the final functional test.

| QUESTION                                                         | ANSWER                                                                                           |
|------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| What complete identity is required for 86691-00750-0435-15?      | Record every character of the order code from the physical marking.                              |
| What maintenance boundary is required for 86691-00750-0435-15?   | Define the installed location, affected channel and isolation boundary before work.              |
| What connector record is required for 86691-00750-0435-15?       | Document connector orientation, terminal labels and cable restraint before disconnection.        |
| What mounting restoration is required for 86691-00750-0435-15?   | Preserve the as-found mounting reference so the installed arrangement can be restored.           |
| What replacement acceptance is required for 86691-00750-0435-15? | Use Bently Nevada confirmation and the approved maintenance record for any replacement decision. |
| What pre-work evidence is required for 86691-00750-0435-15?      | Capture photographs and drawing references before disturbing the installation.                   |
| What final acceptance is required for 86691-00750-0435-15?       | Retain connection checks, diagnostics and the controlled functional result.                      |
| What published origin is required for 86691-00750-0435-15?       | The current publishing instruction specifies USA.                                                |

# Precautions and Related Products

| NO. | PRECAUTION                                                                                   |
|-----|----------------------------------------------------------------------------------------------|
| 1   | Verify 86691-00750-0435-15 from the physical marking before work.                            |
| 2   | Do not infer dimensions, electrical values or approvals from a nearby model.                 |
| 3   | Photograph and record the installed position and mating hardware before removal.             |
| 4   | Label every conductor, connector and cable route before disconnection.                       |
| 5   | Ask Bently Nevada support to confirm any proposed replacement or compatibility claim.        |
| 6   | Restore the documented arrangement and complete a controlled functional test before release. |
