

APTER POWER INSTALLATION & VERIFICATION REFERENCE

6SC6512-0AA02

A separate model-specific field checklist

Use this reference to verify the exact Siemens component before installation, substitution, or recommissioning. It intentionally does not repeat unconfirmed values.

Manufacturer	Siemens
Prepared by	Apter Power
Document ID	AP-SIE-26-6SC6512-0AA02-IV-R1
Revision	R1
Issue date	2026-08-14

1. Pre-Installation Verification

Step	Check	Required evidence
1	Identity	Match every character of 6SC6512-0AA02 to the physical label; record revision and serial data.
2	Host system	Confirm rack, slot, CPU/drive/controller, firmware, project, and machine-builder approval.
3	Electrical	Verify supply, signal type, channel limits, grounding, shielding, and connector pinout from the exact Siemens document.
4	Mechanical	Confirm form factor, keying, mounting, clearances, cable routing, and environmental limits.
5	Lifecycle	6SC6512-0AA02 is legacy SIMODRIVE hardware. Confirm current repair and replacement options with Siemens using the complete nameplate.
6	Commissioning	Apply the original test procedure and record results before returning the equipment to service.

Product-Specific Precautions

- Wait for DC-link discharge and verify absence of voltage
- Back up all axis parameters
- Photograph switches, connectors, and rating plates
- Verify motor and feedback data
- Perform a reduced-speed no-load direction test before reconnecting the process

2. Commissioning Record

Record item	Site entry
Physical model / MLFB	
Serial or revision	
Host system / machine	
Rack / slot / location	
Firmware / project backup	
Connector and wiring verified	
Functional test result	
Technician / date	

Source Basis

Siemens SIMODRIVE family documentation, Industry Online Support, and the exact physical 6SC6512-0AA02 nameplate.

Important Notice

This Apter Power checklist is not a Siemens installation instruction. The current Siemens documentation, the physical nameplate, the host-equipment manual, and applicable safety rules control all work.
