DS200TBQCG1ABB

Analog Input Milliamp I/O Termination Module

General Electric DS200TBQCG1ABB is a analog input milliamp i/o termination module for Mark V Speedtronic RST analog-I/O path.

DS200TBQCG1ABB configuration dashboard

Installed-system continuity

Interfaces milliamp inputs, position inputs and configured milliamp outputs with the RST-core analog boards without redefining the approved equipment architecture.

Identity-led replacement

The complete DS200TBQCG1ABB marking keeps revision, interface and fitted-position decisions tied to the actual unit.

Controlled return to service

Connector, terminal, setting and diagnostic evidence are checked before the affected function is released.

Exact order-code identity

Product type	Analog Input Milliamp I/O Termination Module
Product family	DS200 / Mark V
Functional acronym	TBQC
Functional description	RST analog termination board
Input signal class	4-20 mA current inputs
Position signal class	LVDT/R position inputs
Output range selection	20 mA or 200 mA maximum by hardware jumper
Associated board path	TCQA analog I/O board

DS200TBQCG1ABB performs a defined analog input milliamp i/o termination module role: it interfaces milliamp inputs, position inputs and configured milliamp outputs with the RST-core analog boards. Selection is based on the complete marking and the documented DS200 / Mark V execution.

Analog Input Milliamp I/O Termination Module technical capability map

Installation context	RST-core terminal assembly	**Revision suffix**	G1ABB

Installed signal or connection path

Field signal > **Termination block** > **DS200TBQCG1ABB** > **LocalBus** > **Control strategy**

System interpretation boundary

The verified technical rows distinguish exact-model identity from family-level system context. Dimensions and weight are shipping estimates supplied for this offered item; technical acceptance follows the installed drawing and manufacturer evidence.

Before exchange, record the fitted position, every connector or terminal identity, adjustable settings and the healthy operating baseline. After installation, prove the affected function under a controlled site procedure.

Application fit decisions for DS200TBQCG1ABB

Exact-model service replacement

Replace the same DS200TBQCG1ABB execution after documenting the installed interface.

System maintenance

Retain the Mark V Speedtronic RST analog-I/O path relationship and approved drawing references.

Controlled fault isolation

Separate board, wiring, power and companion-hardware causes before substitution.

Commissioning evidence

Capture diagnostics and a functional test of the affected analog input milliamp i/o termination module path.

Engineering decision matrix

Which installed identity details must be recorded for DS200TBQCG1ABB?	Record the full label, fitted position, connector or terminal map, and every adjustable setting before removal.

What interface check is most important before replacing DS200TBQCG1ABB?	Compare the receiving hardware and every keyed, numbered or polarized connection with the approved drawing.
How should settings be controlled when servicing DS200TBQCG1ABB?	Photograph and transcribe jumpers, switches, firmware or range selections that apply to this exact execution.
What should be inspected before fitting DS200TBQCG1ABB?	Inspect contacts, terminal hardware, board supports, protective earth and nearby wiring for damage or contamination.

Applications must be evaluated against the exact installed machine drawing, target, companion hardware and receiving channel. Related product references do not imply substitution.

DS200TBQCG1ABB service controls and maintenance logic

Capture the complete marking

Photograph DS200TBQCG1ABB and all secondary labels before removal.

Preserve installed settings

Record jumpers, switches, firmware, ranges or calibration references that apply.

Control stored energy

Follow the approved isolation and electrostatic handling procedure.

Label every connection

Mark conductors, plugs, fibers or tubing by their installed identifiers.

Inspect mating hardware

Check contacts, terminals, guides, supports and protective earth.

Prove the affected function

Verify diagnostics and actual process or equipment response before handover.

Additional technical questions

Which companion hardware must be verified with DS200TBQCG1ABB?	Confirm the associated controller, terminal board, rack, power source or field device named by the installed design.
How should energization be managed after installing DS200TBQCG1ABB?	Restore energy in the approved sequence, watch diagnostics, and stop if the expected healthy state is not obtained.
What functional proof adds technical value for DS200TBQCG1ABB?	Exercise the affected signal, protection, power or communications path and retain before-and-after readings.
What handover record is required after commissioning DS200TBQCG1ABB?	Keep the exact part marking, installed photographs, settings, test results, deviations and responsible approval.

Technical notes

Evidence boundary	GE Mark V hardware reference GEH-6153
Exact-model rule	Do not infer interchangeability from a similar family code; match DS200TBQCG1ABB completely.
Acceptance record	Retain identity, interface, settings, diagnostics and functional proof.
Installed function	DS200TBQCG1ABB is controlled as the analog input milliamp i/o termination module used in Mark V Speedtronic RST analog-I/O path.
Receiving comparison	Compare complete marking, mechanical execution, connectors and all secondary labels before acceptance.
Connection record	Retain connector, terminal, cable or field-device identities in their installed sequence.
Setting record	Preserve every fitted jumper, switch, firmware, range or adjustment reference that applies.
As-found baseline	Capture the healthy static value, indication or communications state before disturbing the assembly.
As-left proof	Record diagnostics plus a controlled functional result for the affected analog input milliamp i/o termination module path.
Document package	File photographs, test readings, deviations, approvals and the applicable drawing revision together.
