

APTER POWER INSTALLATION & VERIFICATION REFERENCE

6DS1723-8BA

A separate model-specific field checklist

Use this reference to verify the exact Siemens component before installation, substitution, or recommissioning. It intentionally does not repeat unconfirmed values.

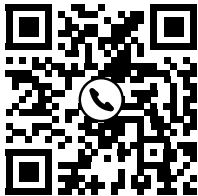

Manufacturer	Siemens
Prepared by	Apter Power
Document ID	AP-SIE-27-6DS1723-8BA-IV-R1
Revision	R1
Issue date	2026-08-14

6DS1723-8BA

1. Pre-Installation Verification

Step	Check	Required evidence
1	Identity	Match every character of 6DS1723-8BA to the physical label; record revision and serial data.
2	Host system	Confirm rack, slot, CPU/drive/controller, firmware, project, and machine-builder approval.
3	Electrical	Verify supply, signal type, channel limits, grounding, shielding, and connector pinout from the exact Siemens document.
4	Mechanical	Confirm form factor, keying, mounting, clearances, cable routing, and environmental limits.
5	Lifecycle	6DS1723-8BA is legacy TELEPERM hardware. No exact public Siemens PLM statement was located for this suffix.
6	Commissioning	Apply the original test procedure and record results before returning the equipment to service.

Product-Specific Precautions

- Photograph the full label and connector keying
- Archive the control diagrams and loop list
- Do not assume analog or digital function from third-party listings
- Verify rack power and grounding
- Perform loop-by-loop testing after installation

2. Commissioning Record

Record item	Site entry
Physical model / MLFB	
Serial or revision	
Host system / machine	
Rack / slot / location	
Firmware / project backup	
Connector and wiring verified	
Functional test result	
Technician / date	

Source Basis

Siemens Industry Online Support material identifying 6DS1723-8BA in the TELEPERM 6DS hardware context, plus the physical module nameplate.

Important Notice

This Apter Power checklist is not a Siemens installation instruction. The current Siemens documentation, the physical nameplate, the host-equipment manual, and applicable safety rules control all work.
