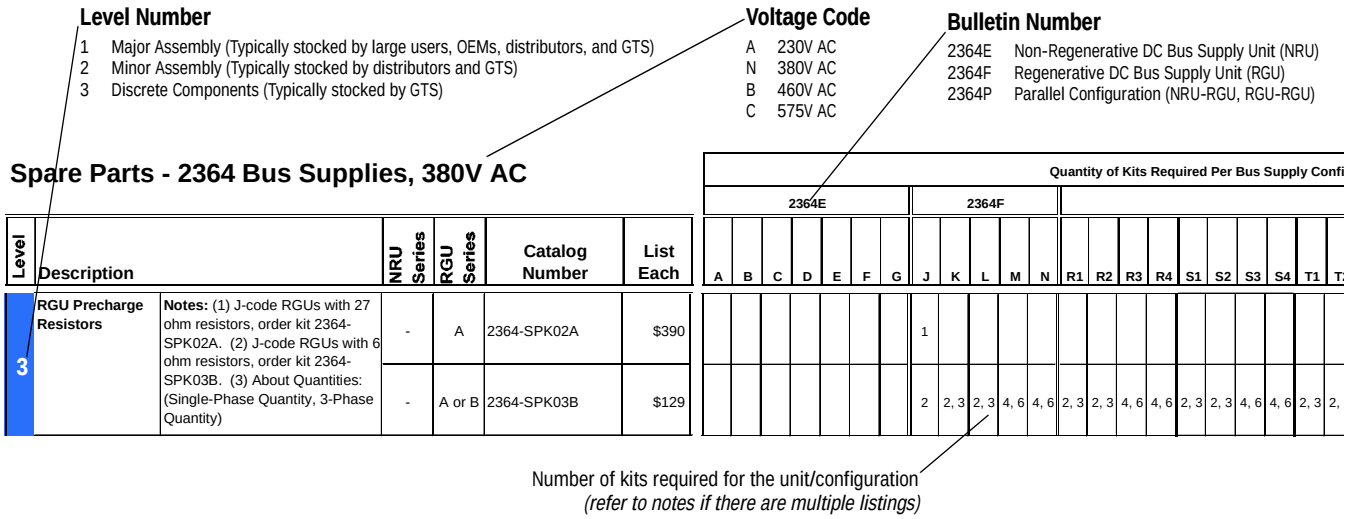
2364 Spare Parts

Using This Publication

To find a particular spare part in the list, look under the appropriate voltage listing (230, 380, 460, or 575V AC) for the part name. Determine which spare part kit is correct for your unit, and how many of the kits are required. Details of the spare part list are shown in Figure 1.

Figure 1
Spare Part List



Example 1
A 380V AC, J-code RGU needs kits ordered for replacing its 27 ohm precharge resistors.

In the spare parts list, look under the 380V AC listing for RGU precharge resistors. The note indicates that J-code RGUs with 27 ohm resistors need kit 2364-SPK02A. The listing for kit 2364-SPK02A shows that one kit is required to replace all the precharge resistors in this unit.

Therefore, order one 2364-SPK02A kit.

Example 2
A unit, catalog number 2364F-MNN, has a single-phase precharge circuit. Kits need to be ordered to replace its precharge resistors.

In the spare parts list, look in the 380V AC (voltage code N) listing for RGU precharge resistors. The listing shows that four resistor kits are needed for M-code 2364F units with a single-phase precharge circuit, while six resistor kits are needed for M-code 2364F units with a 3-phase precharge circuit.

Therefore, order four 2364-SPK03B kits.

Spare Parts - 2364 Bus Supplies, 575V AC

Level	Description		NRU Series	RGU Series	Catalog Number	List Each	Quantity of Kits Required Per Bus Supply Configuration
