

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB 3BHE036348R0102 – Requested XZC826A102 Nameplate Verification

XZC826A102 Hardware Identity Guide

ABB 3BHE036348R0102 – Requested XZC826A102 Nameplate Verification

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB 3BHE036348R0102 – Requested XZC826A102 Nameplate Verification
Reference number	3BHE036348R0102
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Nameplate and order-record verification path

The requested identity is ABB XZC826A102 with number 3BHE036348R0102, but that mapping was not verified in an accessible exact ABB source during this research. ABB official material reviewed here does not establish what the product is, its host system, or its functional role.

01	ABB official material reviewed here does not establish what the product is, its host system, or its functional role. It therefore cannot be described as a splitter, controller, interface, I/O, communication, or power board.
02	No analog, digital, optical, communication, voltage, current, power, or measurement signal is officially documented for this exact requested pairing. Nothing from XZC825A102 or XZC827A102 may be transferred to it.
03	Publication is on hold until a clear physical ABB nameplate or exact ABB document confirms identity, function, host equipment, signals, companion components, and safe installation requirements.

Unsupported technical-field boundaries

01	Verification Status: NOT_VERIFIED_FROM_AN_ACCESSIBLE_EXACT_ABB_SOURCE
02	Exact Mapping: No accessible ABB product page or ABB manual was found that maps XZC826A102 to 3BHE036348R0102.
03	All product-function claims

XZC826A102 identity safeguards

01	Do not publish or install the requested pairing until XZC826A102 and 3BHE036348R0102 are jointly verified on an ABB source or physical label.
02	Do not copy XZC825A102, XZC827A102, or any third-party splitter-board parameters.
03	Do not assign a host system, industrial application, or system function without an exact ABB document.
04	Do not populate origin, tariff code, weight, dimensions, lifecycle, voltage, signals, or protocol from inference.
05	Keep any physical unit isolated and use ESD controls until the exact host safety manual is identified.
06	Release publication only after the evidence record is archived with the product data.

Identity and release controls

Verification Status	NOT_VERIFIED_FROM_AN_ACCESSIBLE_EXACT_ABB_SOURCE
