

Emerson 775XD11NAWA3WK9

775XD11NAWA3WK9 Evidence-Bounded Product Information Manual

Emerson Wireless 775 THUM Adapter configuration

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Emerson manufacturer sources. No product photograph is included.

Product / lookup identity	Emerson 775XD11NAWA3WK9
Reference number	775XD11NAWA3WK9
Document basis	Published Emerson product records, PDFs, and manuals listed on page 3

Workflow and system context

Emerson 775XD11NAWA3WK9 is an evidence-bounded Wireless 775 THUM Adapter configuration in the Emerson installed-base context. System role: It adds IEC 62591 WirelessHART communication to compatible wired HART devices while scavenging operating power from the 4-20 mA loop.

01	System Inputs: It adds IEC 62591 WirelessHART communication to compatible wired HART devices while scavenging operating power from the 4-20 mA loop.
02	Processing: The adapter supports compatible 2-, 3- and 4-wire HART 5 or later devices. Loop load, update rate, network security, antenna placement and hazardous-area approval must match the project.

Published context and boundaries

01	Verify the complete Emerson 775XD11NAWA3WK9 nameplate, revision and installed-system documentation before use.
02	The NA code means no product approval is selected; do not represent this exact order as hazardous-area approved.
03	Current formal lifecycle phase, origin, HS code, dimensions and logistics weight remain HOLD without exact Emerson evidence.

Verification and release checks

01	Verify the complete Emerson 775XD11NAWA3WK9 nameplate, revision and installed-system documentation before use.
02	The NA code means no product approval is selected; do not represent this exact order as hazardous-area approved.
03	De-energize and follow the site's approved electrical and process-safety procedure before disturbing hardware or field wiring.
04	Back up controller, network, I/O, addressing and configuration data before replacement or firmware work.
05	Verify every companion module, termination unit, cable, connector and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.

Identity and release controls

Verification Status	Verified Exact Ordering Configuration
