

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB IEPAS02

Product Reference

ABB IEPAS02 AC system power module

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB IEPAS02
Reference number	IEPAS02
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

ABB IEPAS02 is an evidence-bounded AC system power module in the Bailey INFI 90 / Harmony Rack installed-base context. System role: It belongs to the legacy AC modular power architecture supplying cabinet system power; exact output loading remains project-specific. System context: ABB IEPAS02 AC system power module.

Published field	Manufacturer-published value or verified identity note
Official identity	IEPAS02 AC system power supply/module
Architecture	Legacy INFI 90 AC modular power
Evolution context	MPS III planning path
Exact outputs / loading	HOLD pending the cabinet instruction
Lifecycle / trade	HOLD
Verification Status	Verified Exact Official Spare Identity

System function and signal path

01	System Inputs: It belongs to the legacy AC modular power architecture supplying cabinet system power; exact output loading remains project-specific.
02	Processing: ABB evolution material points legacy MPS I installations toward MPS III; that migration guidance is not a same-hardware substitution statement.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for ABB IEPAS02.

2 System documentation: Provides a source-traceable boundary for rack, network, I/O and termination records.

3 Commissioning review: Guides pre-power checks, companion-module verification and controlled functional testing.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is ABB IEPAS02?	It is an ABB AC system power module; this page is limited to the exact evidence boundary stated in the cited ABB sources.
Is the exact model identity verified?	Verified Exact Official Spare Identity.
What is its system role?	It belongs to the legacy AC modular power architecture supplying cabinet system power; exact output loading remains project-specific.
Which system family is documented?	ABB Bailey INFI 90 / Harmony Rack installed-base architecture, subject to the exact source boundary.
Are related models automatic substitutes?	No. A sibling, SP/IN generation, repair code or evolution path is not an alias or unconditional drop-in approval.
Must the physical nameplate be checked?	Yes. Verify the model, revision, firmware and all order or repair suffixes.
