

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB INICT13

Product Reference

ABB INICT13 Cnet-to-computer transfer module

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB INICT13
Reference number	INICT13
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

ABB INICT13 is an evidence-bounded Cnet-to-computer transfer module in the Bailey INFI 90 / Harmony Rack installed-base context. System role: It is used in an ABB Cnet/INFI-NET computer-interface architecture; exact suffix, port and firmware details remain revision-gated. System context: ABB INICT13 Cnet-to-computer transfer module.

Published field	Manufacturer-published value or verified identity note
Product type	Cnet-to-computer transfer module
Required network interface	INNIS21 in ICT13-based ICI03
MPI requirement	ABB states INICT13 does not require MPI
Ports / capacity / firmware	HOLD pending exact revision manual
Lifecycle / trade / weight	HOLD
Verification Status	Verified Exact Model Identity And Evolution Role

System function and signal path

01	System Inputs: It is used in an ABB Cnet/INFI-NET computer-interface architecture; exact suffix, port and firmware details remain revision-gated.
02	Processing: Use with the exact INNIS21-based interface and ABB project documentation; do not assume INICT12 or INICT03A wiring.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for ABB INICT13.

2 System documentation: Provides a source-traceable boundary for rack, network, I/O and termination records.

3 Commissioning review: Guides pre-power checks, companion-module verification and controlled functional testing.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is ABB INICT13?	It is an ABB Cnet-to-computer transfer module; this page is limited to the exact evidence boundary stated in the cited ABB sources.
Is the exact model identity verified?	Verified Exact Model Identity And Evolution Role.
What is its system role?	It is used in an ABB Cnet/INFI-NET computer-interface architecture; exact suffix, port and firmware details remain revision-gated.
Which system family is documented?	ABB Bailey INFI 90 / Harmony Rack installed-base architecture, subject to the exact source boundary.
Are related models automatic substitutes?	No. A sibling, SP/IN generation, repair code or evolution path is not an alias or unconditional drop-in approval.
Must the physical nameplate be checked?	Yes. Verify the model, revision, firmware and all order or repair suffixes.
