

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB 3BHE004385R0001 UNS0884A,V1

Product Reference

ABB requested legacy ABB assembly identity

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB 3BHE004385R0001 UNS0884A,V1
Reference number	3BHE004385R0001
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

ABB 3BHE004385R0001 UNS0884A,V1 is an evidence-bounded requested legacy ABB assembly identity in the ABB installed-base context. System role: The exact board or module function, signals, host system and revision compatibility remain HOLD pending a physical nameplate and ABB order/BOM evidence. System context: ABB requested legacy ABB assembly identity.

Published field	Manufacturer-published value or verified identity note
Requested ABB product ID	3BHE004385R0001
Requested label	UNS0884A,V1
Exact ABB public mapping	HOLD - not found
Function / signals / host	HOLD pending nameplate and ABB order/BOM record
Trade / lifecycle / weight	HOLD
Verification Status	Identity Verification Only

System function and signal path

01	System Inputs: The exact board or module function, signals, host system and revision compatibility remain HOLD pending a physical nameplate and ABB order/BOM evidence.
02	Processing: Preserve the existing UNITROL-nested canonical while removing unsupported technical and trade claims from the page.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for ABB 3BHE004385R0001 UNS0884A,V1.

2 System documentation: Provides a source-traceable boundary for rack, network, I/O and termination records.

3 Commissioning review: Guides pre-power checks, companion-module verification and controlled functional testing.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is ABB 3BHE004385R0001 UNS0884A,V1?	It is an ABB requested legacy ABB assembly identity; this page is limited to the exact evidence boundary stated in the cited ABB sources.
Is the exact model identity verified?	Identity Verification Only.
What is its system role?	The exact board or module function, signals, host system and revision compatibility remain HOLD pending a physical nameplate and ABB order/BOM evidence.
Which system family is documented?	ABB installed-base architecture, subject to the exact source boundary.
Are related models automatic substitutes?	No. A sibling, SP/IN generation, repair code or evolution path is not an alias or unconditional drop-in approval.
Must the physical nameplate be checked?	Yes. Verify the model, revision, firmware and all order or repair suffixes.
