

MANUFACTURER-SOURCE TECHNICAL REFERENCE

Siemens C98043-A7105-L4-9

Product Reference

Siemens requested SINAMICS DCM power-interface board revision

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Siemens manufacturer sources. No product photograph is included.

Product / lookup identity	Siemens C98043-A7105-L4-9
Reference number	C98043-A7105-L4-9
Document basis	Published Siemens product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

Siemens C98043-A7105-L4-9 is an evidence-bounded requested SINAMICS DCM power-interface board revision. System role: The verified base board is the power-interface module used in the documented 4Q SINAMICS DCM architecture. System context: Siemens requested SINAMICS DCM power-interface board revision.

Published field	Manufacturer-published value or verified identity note
Requested label	C98043-A7105-L4-9
Verified base board	C98043-A7105-L4
Documented topology	4Q SINAMICS DCM
Terminal -9 revision	HOLD - verify physical board label and Siemens service record
Orderable spare mapping	Verify converter MLFB and serial number with Siemens
Verification Status	Requested Revision Base Board Verified

System function and signal path

01	System Inputs: The verified base board is the power-interface module used in the documented 4Q SINAMICS DCM architecture.
02	Processing: Match converter order number, rated voltage/current, 4Q topology, option package, board label and complete hardware revision before replacement.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for Siemens C98043-A7105-L4-9.

2 System documentation: Provides a source-traceable boundary for the documented SINAMICS DCM power-interface architecture configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is Siemens C98043-A7105-L4-9?	It is an evidence-bounded requested SINAMICS DCM power-interface board revision; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Requested Revision Base Board Verified.
What is its system role?	The verified base board is the power-interface module used in the documented 4Q SINAMICS DCM architecture.
Which installed-base context is documented?	SINAMICS DCM power-interface architecture.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
