

MANUFACTURER-SOURCE TECHNICAL REFERENCE

Allen-Bradley 1336-PB-SP5A

Product Reference

Rockwell Automation 1336 precharge printed-circuit board

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Rockwell Automation manufacturer sources. No product photograph is included.

Product / lookup identity	Allen-Bradley 1336-PB-SP5A
Reference number	1336-PB-SP5A
Document basis	Published Rockwell Automation product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

Allen-Bradley 1336-PB-SP5A is an evidence-bounded 1336 precharge printed-circuit board. System role: It is a precharge circuit-board spare part for the exact 1336 drive frames and voltage class listed in the official parts table. System context: Rockwell Automation 1336 precharge printed-circuit board.

Published field	Manufacturer-published value or verified identity note
Exact catalog number	1336-PB-SP5A
Product class	Precharge PCB
Documented drive family	1336STEF
Documented voltage class	460 V
Documented range	X40-X60 HP
Lifecycle / origin / HS / shipment weight	Not published for the exact spare board
Verification Status	Verified Exact Catalog Number

System function and signal path

01	System Inputs: It is a precharge circuit-board spare part for the exact 1336 drive frames and voltage class listed in the official parts table.
02	Processing: Match the complete drive catalog, voltage class, horsepower range, frame and board revision before replacement.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for Allen-Bradley 1336-PB-SP5A.

2 System documentation: Provides a source-traceable boundary for the documented 1336 drive spare-parts architecture configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is Allen-Bradley 1336-PB-SP5A?	It is an evidence-bounded 1336 precharge printed-circuit board; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Verified Exact Catalog Number.
What is its system role?	It is a precharge circuit-board spare part for the exact 1336 drive frames and voltage class listed in the official parts table.
Which installed-base context is documented?	1336 drive spare-parts architecture.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
