Workflow and system context

Bently Nevada 102044-00-18-10-02-00 is an evidence-bounded requested 102044 sensor-accessory configuration. System role: The page is an identity and configuration-verification record for the exact requested string; it does not infer sensor type, cable length or mechanical options.

- | | |
|----|---|
| 01 | System Inputs: The page is an identity and configuration-verification record for the exact requested string; it does not infer sensor type, cable length or mechanical options. |
| 02 | Processing: Verify every option field against the physical label and current Bently Nevada ordering documentation before installation. |

Published context and boundaries

- | | |
|----|---|
| 01 | Verify the complete Bently Nevada 102044-00-18-10-02-00 physical label and installed-system documentation before use. |
| 02 | A different site record, 102044-00-48-10-05, is a distinct full configuration and must not be overwritten or treated as equivalent. |
| 03 | Origin and HS code remain unpublished unless an exact manufacturer record or the physical package label establishes them. |

Verification and release checks

01	Verify the complete Bently Nevada 102044-00-18-10-02-00 label, revision and installed-system documentation before use.
02	A different site record, 102044-00-48-10-05, is a distinct full configuration and must not be overwritten or treated as equivalent.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, drive, network and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.
