

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB 3HAC044361-003

Product Reference

ABB requested ABB Robotics spare-part identity

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB 3HAC044361-003
Reference number	3HAC044361-003
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

ABB 3HAC044361-003 is an evidence-bounded requested ABB Robotics spare-part identity. System role: The exact function, robot family, controller, dimensions, mass and replacement scope remain gated to the physical ABB label and ABB order or service record. System context: ABB requested ABB Robotics spare-part identity.

Published field	Manufacturer-published value or verified identity note
Requested ABB number	3HAC044361-003
Official ABB index identity	Exact record indexed; current direct page unavailable
Product role / host / revision	HOLD – ABB order or service record required
Electrical / mechanical data	HOLD
Origin / HS code / shipment weight	Not published
Verification Status	Requested Label Official Index Record Now Unavailable

System function and signal path

01	System Inputs: The exact function, robot family, controller, dimensions, mass and replacement scope remain gated to the physical ABB label and ABB order or service record.
02	Processing: Confirm the complete 3HAC044361-003 nameplate, robot serial number, controller generation, assembly drawing and ABB service instruction before supply or installation.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for ABB 3HAC044361-003.

2 System documentation: Provides a source-traceable boundary for the documented ABB Robotics spare-part identity verification configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is ABB 3HAC044361-003?	It is an evidence-bounded requested ABB Robotics spare-part identity; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Requested Label Official Index Record Now Unavailable.
What is its system role?	The exact function, robot family, controller, dimensions, mass and replacement scope remain gated to the physical ABB label and ABB order or service record.
Which installed-base context is documented?	ABB Robotics spare-part identity verification.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
