

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB 3HAC044361-003

3HAC044361-003 Requested-Label Verification Evidence-Bounded Product Information Manual

ABB requested ABB Robotics spare-part identity

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB 3HAC044361-003
Reference number	3HAC044361-003
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Workflow and system context

ABB 3HAC044361-003 is an evidence-bounded requested ABB Robotics spare-part identity. System role: The exact function, robot family, controller, dimensions, mass and replacement scope remain gated to the physical ABB label and ABB order or service record.

- | | |
|----|--|
| 01 | System Inputs: The exact function, robot family, controller, dimensions, mass and replacement scope remain gated to the physical ABB label and ABB order or service record. |
| 02 | Processing: Confirm the complete 3HAC044361-003 nameplate, robot serial number, controller generation, assembly drawing and ABB service instruction before supply or installation. |

Published context and boundaries

- | | |
|----|---|
| 01 | Verify the complete ABB 3HAC044361-003 physical label and installed-system documentation before use. |
| 02 | Do not infer a cable, board, motor, mechanical assembly or compatible robot family from nearby 3HAC numbers or reseller descriptions. |
| 03 | Origin and HS code remain unpublished unless an exact manufacturer record or the physical package label establishes them. |

Verification and release checks

01	Verify the complete ABB 3HAC044361-003 label, revision and installed-system documentation before use.
02	Do not infer a cable, board, motor, mechanical assembly or compatible robot family from nearby 3HAC numbers or reseller descriptions.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, drive, network and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.
