

MANUFACTURER-SOURCE TECHNICAL REFERENCE

Bently Nevada 21747-00-20-10-02

Product Reference

Baker Hughes / Bently Nevada requested 7200 Series 21747 label requiring order-structure verification

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Baker Hughes / Bently Nevada manufacturer sources. No product photograph is included.

Product / lookup identity	Bently Nevada 21747-00-20-10-02
Reference number	21747-00-20-10-02
Document basis	Published Baker Hughes / Bently Nevada product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

Bently Nevada 21747-00-20-10-02 is an evidence-bounded requested 7200 Series 21747 label requiring order-structure verification. System role: Publish only the requested label and verified 7200 family boundary; do not decode 00-20-10-02 as probe fields. System context: Baker Hughes / Bently Nevada requested 7200 Series 21747 label requiring order-structure verification.

Published field	Manufacturer-published value or verified identity note
Exact requested identity	21747-00-20-10-02
Product class	requested 7200 Series 21747 label requiring order-structure verification
Verified base	21747 7200 Series extension cable
Published ordering structure	21747-A-B
Requested full label	21747-00-20-10-02
Configuration decoding	HOLD - requested suffix count does not match the supplied table
Release gate	Nameplate or Baker Hughes legacy order record required

System function and signal path

01	System Inputs: Publish only the requested label and verified 7200 family boundary; do not decode 00-20-10-02 as probe fields.
02	Processing: Use only with the exact host, terminal base, cable, firmware and engineering configuration documented for the installed system.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for Bently Nevada 21747-00-20-10-02.

2 System documentation: Provides a source-traceable boundary for the documented Bently Nevada 7200 proximity transducer system configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is Bently Nevada 21747-00-20-10-02?	It is an evidence-bounded requested 7200 Series 21747 label requiring order-structure verification; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Requested Label Verification.
What is its system role?	Publish only the requested label and verified 7200 family boundary; do not decode 00-20-10-02 as probe fields.
Which installed-base context is documented?	Bently Nevada 7200 proximity transducer system.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
