

B&R X20CP1485-1

X20CP1485-1 Evidence-Bounded Product Information Manual

B&R Industrial Automation X20 System fanless CPU

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited B&R Industrial Automation manufacturer sources. No product photograph is included.

Product / lookup identity	B&R X20CP1485-1
Reference number	X20CP1485-1
Document basis	Published B&R Industrial Automation product records, PDFs, and manuals listed on page 3

Workflow and system context

B&R X20CPI485-1 is an evidence-bounded X20 System fanless CPU. System role: It is a fanless X20 CPU with Ethernet, POWERLINK, USB, RS232 and X2X Link interfaces plus one modular interface slot.

- | | |
|----|---|
| 01 | System Inputs: It is a fanless X20 CPU with Ethernet, POWERLINK, USB, RS232 and X2X Link interfaces plus one modular interface slot. |
| 02 | Processing: Use only with the exact host, terminal base, cable, firmware and engineering configuration documented for the installed system. |

Published context and boundaries

- | | |
|----|---|
| 01 | Verify the complete B&R X20CPI485-1 physical label and installed-system documentation before use. |
| 02 | Do not transfer ratings, compatibility or lifecycle claims from sibling or successor models. |
| 03 | Origin and HS code remain unpublished unless an exact manufacturer record or the physical package label establishes them. |

Verification and release checks

01	Verify the complete B&R X20CPI485-1 label, revision and installed-system documentation before use.
02	Do not transfer ratings, compatibility or lifecycle claims from sibling or successor models.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, drive, network and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.

Identity and release controls

Verification Status	Verified Evidence Bounded
