

MANUFACTURER-SOURCE TECHNICAL REFERENCE

Honeywell CC-PAIH02 51405038-376

Product Reference

Honeywell Series C high-level analog input module with HART

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Honeywell manufacturer sources. No product photograph is included.

Product / lookup identity	Honeywell CC-PAIH02 51405038-376
Reference number	51405038-376
Document basis	Published Honeywell product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

Honeywell CC-PAIH02 51405038-376 is an evidence-bounded Series C high-level analog input module with HART. System role: The verified CC-PAIH02 model provides high-level analog input channels with HART communication in the documented Series C architecture. System context: Honeywell Series C high-level analog input module with HART.

Published field	Manufacturer-published value or verified identity note
Exact requested identity	CC-PAIH02 51405038-376
Product class	Series C high-level analog input module with HART
Model	CC-PAIH02
Requested order code	51405038-376; verify physical label
Channels	16
Signal types	Voltage/current high-level analog input
Protocol	HART

System function and signal path

01	System Inputs: The verified CC-PAIH02 model provides high-level analog input channels with HART communication in the documented Series C architecture.
02	Processing: Use only with the exact host, terminal base, cable, firmware and engineering configuration documented for the installed system.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for Honeywell CC-PAIH02 51405038-376.

2 System documentation: Provides a source-traceable boundary for the documented Honeywell Series C I/O configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is Honeywell CC-PAIH02 51405038-376?	It is an evidence-bounded Series C high-level analog input module with HART; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Verified Evidence Bounded.
What is its system role?	The verified CC-PAIH02 model provides high-level analog input channels with HART communication in the documented Series C architecture.
Which installed-base context is documented?	Honeywell Series C I/O.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
