

MANUFACTURER-SOURCE TECHNICAL REFERENCE

Bently Nevada 86517-XX-XX-01-02 Mod 159840-1

Product Reference

Baker Hughes / Bently Nevada requested 86517 accelerometer-interface modification label

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited Baker Hughes / Bently Nevada manufacturer sources. No product photograph is included.

Product / lookup identity	Bently Nevada 86517-XX-XX-01-02 Mod 159840-1
Reference number	86517-XX-XX-01-02 Mod 159840-1
Document basis	Published Baker Hughes / Bently Nevada product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

Bently Nevada 86517-XX-XX-01-02 Mod 159840-1 is an evidence-bounded requested 86517 accelerometer-interface modification label. System role: It interfaces a compatible transducer or charge-amplifier signal into the approved monitoring architecture, subject to the exact installed drawing. System context: Baker Hughes / Bently Nevada requested 86517 accelerometer-interface modification label.

Published field	Manufacturer-published value or verified identity note
Exact requested identity	86517-XX-XX-01-02 Mod 159840-1
Product class	requested 86517 accelerometer-interface modification label
Verified base	86517 accelerometer interface module / documented charge-amplifier application
Requested pattern	86517-XX-XX-01-02
Requested modification	159840-1
Wildcard decoding	HOLD
Modification mapping	HOLD

System function and signal path

- 01 System Inputs: It interfaces a compatible transducer or charge-amplifier signal into the approved monitoring architecture, subject to the exact installed drawing.
- 02 Processing: Use only with the exact host, terminal base, cable, firmware and engineering configuration documented for the installed system.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for Bently Nevada 86517-XX-XX-01-02 Mod 159840-1.

2 System documentation: Provides a source-traceable boundary for the documented Bently Nevada 3500/Orbit 60 dynamic measurement architecture configuration.

3 Commissioning review: Guides identity, companion-hardware, wiring and controlled functional checks before return to service.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is Bently Nevada 86517-XX-XX-01-02 Mod 159840-1?	It is an evidence-bounded requested 86517 accelerometer-interface modification label; this page is limited to the cited manufacturer evidence.
Is the exact identity verified?	Requested Label Verification.
What is its system role?	It interfaces a compatible transducer or charge-amplifier signal into the approved monitoring architecture, subject to the exact installed drawing.
Which installed-base context is documented?	Bently Nevada 3500/Orbit 60 dynamic measurement architecture.
Are related models automatic substitutes?	No. A sibling, repair code, suffix or engineering replacement is not an unconditional drop-in approval.
Must the physical label be checked?	Yes. Verify the model, revision, firmware and all order or configuration suffixes.
