## Workflow and system context

Siemens 6AV6545-0DB10-0AX0 is an evidence-bounded SIMATIC MP370 15-inch touch Multi Panel. System role: It provides a 15-inch touch operator interface for the documented SIMATIC HMI environment.

|    |                                                                                                                                             |
|----|---------------------------------------------------------------------------------------------------------------------------------------------|
| 01 | System Inputs: It provides a 15-inch touch operator interface for the documented SIMATIC HMI environment.                                   |
| 02 | Processing: Use only with the exact host, terminal base, cable, firmware and engineering configuration documented for the installed system. |

### Published context and boundaries

|    |                                                                                                                           |
|----|---------------------------------------------------------------------------------------------------------------------------|
| 01 | Verify the complete Siemens 6AV6545-0DB10-0AX0 physical label and installed-system documentation before use.              |
| 02 | Do not transfer ratings, compatibility or lifecycle claims from sibling or successor models.                              |
| 03 | Origin and HS code remain unpublished unless an exact manufacturer record or the physical package label establishes them. |

## Verification and release checks

|    |                                                                                                                                        |
|----|----------------------------------------------------------------------------------------------------------------------------------------|
| 01 | Verify the complete Siemens 6AV6545-0DB10-0AX0 label, revision and installed-system documentation before use.                          |
| 02 | Do not transfer ratings, compatibility or lifecycle claims from sibling or successor models.                                           |
| 03 | De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring. |
| 04 | Back up controller, drive, network and configuration data before replacement, migration or firmware work.                              |
| 05 | Verify every companion module, cable, connector, termination and power source from approved drawings.                                  |
| 06 | Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.                               |

## Identity and release controls
