

FC-QPP-0001 V1.3

Safety Manager Processor Pack

Product Identity

The Honeywell FC-QPP-0001 V1.3 is a code- and version-controlled processor pack used in the Safety Manager hardware family. Public Honeywell documentation reviewed for this page does not expose a complete standalone electrical specification for the V1.3 marking, so installation must follow the controlled Safety Manager hardware reference.

Verified Reference Points

1. Version-specific hardware identity
2. Safety-system processor role
3. Chassis and firmware matching
4. Controlled commissioning records

Signal / System Function

Safety-control processing and internal chassis-bus data; it is not a direct field termination module.

Official Manufacturer Basis

Honeywell Safety Manager Hardware Reference EP-SM.MAN.6284
