2. Integration and verification

Signals and data handled

Not independently specified in the cited ABB product-detail record; verify the paired module and loop drawings.

Companion components

Compatible Bailey/BAINET multi-function module, approved cable assemblies and cabinet wiring documentation.

Common industrial applications

Process-control cabinet wiring and field termination for legacy Bailey/BAINET multi-function systems.

Product precautions

- The ABB detail sheet does not state channel or voltage ratings; do not infer them from the termination-unit name.
- Confirm the companion module, cable and cabinet drawing before moving any field wiring.
- Use the physical unit or shipment data for weight because the ABB record lists 0 lb net weight.
