

T8850

Trusted 40-Channel Analog or Digital Output Field Termination Assembly

Controlled Installation Scope

This field guide applies to the exact ICS Triplex T8850 Trusted 40-Channel Analog or Digital Output Field Termination Assembly. Confirm the physical nameplate, matched hardware and controlled project record.

Model-Specific Checks

1. Confirm the exact output module, field cable and SmartSlot architecture before landing T8850 wiring.
2. Engineer field power through the approved T8290 arrangement and verify each group load.
3. Observe the 2 A channel and 40 A assembly limits; T8850 does not provide per-channel fuses.
4. Use TS32 or TS35 DIN rail and retain the required cabinet clearances.
5. Function-test each output group, load state and diagnostic indication before release.

Official Basis

Rockwell Automation PD-T8850 Trusted 40 Channel Analog or Digital Output FTA
