

T8850

Trusted 40-Channel Analog or Digital Output Field Termination Assembly

Product Identity

ICS Triplex T8850 is a Trusted 40-Channel Analog or Digital Output Field Termination Assembly. In a Trusted 8000 system, it connects five groups of eight output circuits between a matched Trusted output module and field loads or analog receivers. It handles up to forty analog or digital output paths using the engineered 18-60 Vdc field-supply arrangement, works with Approved Trusted output module, SmartSlot/field cables, T8290 field-supply arrangement and TS32/TS35 DIN rail, and is used in Shutdown-output marshalling, High-current digital loads, Analog output loops.

Verified Reference Points

1. 40 outputs in five groups of eight; 2 A per channel and 40 A maximum assembly current
2. Designed for the Trusted 8000 architecture
3. connects five groups of eight output circuits between a matched Trusted output module and field loads or analog receivers
4. Model-specific compatible hardware: Approved Trusted output module, SmartSlot/field cables, T8290 field-supply arrangement and TS32/TS35 DIN rail
5. Official dimensions: 110 x 360 x 68 mm

Official Basis

Rockwell Automation PD-T8850 Trusted 40 Channel Analog or Digital Output FTA
