

T8232

Trusted 750 W 28 Vdc Power Pack

Controlled Installation Scope

This field guide applies to the exact ICS Triplex T8232 Trusted 750 W 28 Vdc Power Pack. Confirm the physical nameplate, matched hardware and controlled project record.

Model-Specific Checks

1. Verify T8232 for 28 Vdc output; do not substitute the T8231 24 Vdc variant without design approval.
2. Isolate ac and dc sources and observe the approved shelf removal procedure.
3. Confirm shelf slot, connector condition, cooling airflow and protective earthing.
4. Check load, current sharing and alarm wiring before enabling the output.
5. Prove output voltage, redundancy and alarm response before release to service.

Official Basis

Rockwell Automation PD-T823X Trusted Power System
