

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB RINT6621C 64690698

RINT6621C 64690698 Product Information Manual

ABB RINT6621C 64690698 Official-Source Product Reference

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB RINT6621C 64690698
Reference number	64690698
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Workflow and system context

ABB RINT6621C 64690698 is an evidence-bounded MC interface board in the ABB ACS800 drive installed-base architecture context. System role: This coated R6, 690 V spare-part board must be matched to the exact ACS800 drive hardware and service documentation before replacement.

- | | |
|----|---|
| 01 | System Inputs: This coated R6, 690 V spare-part board must be matched to the exact ACS800 drive hardware and service documentation before replacement. |
| 02 | Processing: ABB lists the board as R6 690 V coated hardware. The cited ACS800-01/04 document sets provide host-level safety and hardware context; ACS800-07 applicability must be verified against the exact drive BOM. |

Published context and boundaries

- | | |
|----|--|
| 01 | Verify the complete ABB RINT6621C 64690698 nameplate, revision and installed-system documentation before use. |
| 02 | Do not merge this record with existing RINT-5611C ID 773341, and do not transfer the RINT-5611C 380-500 V data, part number or fan-kit contents. |
| 03 | Current formal lifecycle phase, origin, HS code, dimensions and logistics weight remain HOLD without exact ABB evidence. |

Verification and release checks

01	Verify the complete ABB RINT6621C 64690698 nameplate, revision and installed-system documentation before use.
02	Do not merge this record with existing RINT-5611C ID 773341, and do not transfer the RINT-5611C 380-500 V data, part number or fan-kit contents.
03	De-energize and follow the site's approved electrical and process-safety procedure before disturbing hardware or field wiring.
04	Back up controller, network, I/O, addressing and configuration data before replacement or firmware work.
05	Verify every companion module, termination unit, cable, connector and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model or successor.

Identity and release controls

Verification Status	Verified Exact Rint6621C And Product Id With Rint5611 Relationship Hold
