

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB BP03 7760052242

Product Reference

ABB BP03 7760052242 Label Verification Official-Source Product Reference

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB BP03 7760052242
Reference number	7760052242
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Product role and published parameters

WHAT IT IS, WHAT IT DOES, AND WHERE IT FITS

ABB BP03 7760052242 is an evidence-bounded SPS03 power-system requested-label and base-unit verification reference in the ABB SPS03 and DCS power-system installed-base architecture context. System role: Use this page to verify whether the physical BP03 item is a power-distribution or base-unit component in the installed SPS03/DCS assembly before service work. System context: ABB BP03 7760052242 Label Verification Official-Source Product Reference.

Published field	Manufacturer-published value or verified identity note
Requested model	BP03
Requested identifier	7760052242
Governing document set	ABB SPS03 power-supply and DCS power-distribution/base-unit manuals - exact revision to verify
Exact ABB product mapping	HOLD pending physical nameplate and a manual or BOM page citing both identifiers
Power and distribution function	HOLD - no sibling specifications transferred
Host and companion hardware	HOLD pending installed-system drawings
Lifecycle, origin and HS	HOLD

System function and signal path

01	System Inputs: Use this page to verify whether the physical BP03 item is a power-distribution or base-unit component in the installed SPS03/DCS assembly before service work.
02	Processing: Power input, output rails, connectors, base-unit position and companion supply relationships must come from the exact manual revision and site wiring drawings.

Applications, answers, and official sources

1 Installed-base maintenance: Supports evidence-led identification and replacement planning for ABB BP03 7760052242.

2 System documentation: Provides a source-traceable boundary for rack, network, I/O and termination records.

3 Commissioning review: Guides pre-power checks, companion-module verification and controlled functional testing.

4 Migration assessment: Separates exact-model facts from successor, sibling and family-level information.

Frequently asked questions

What is ABB BP03 7760052242?	It is an ABB SPS03 power-system requested-label and base-unit verification reference; this page is limited to the exact evidence boundary stated in the cited ABB sources.
Is the exact model identity verified?	Requested Label Only Manual And Nameplate Gate.
What is its system role?	Use this page to verify whether the physical BP03 item is a power-distribution or base-unit component in the installed SPS03/DCS assembly before service work.
Which system family is documented?	ABB SPS03 and DCS power-system installed-base architecture architecture, subject to the exact source boundary.
Are related models automatic substitutes?	No. A sibling, SP/IN generation, repair code or evolution path is not an alias or unconditional drop-in approval.
Must the physical nameplate be checked?	Yes. Verify the model, revision, firmware and all order or repair suffixes.
