

DC-TDIL01 51307780-176

24 VDC Digital Input IOTA Assembly

Product Identity

The Honeywell DC-TDIL01 51307780-176 is identified as a DC-prefix digital-input IOTA assembly associated with the Series C 24 VDC input family. The cited public guide publishes the CC-TDIL01 family interface, but the exact DC-prefix variant must be verified against the installed project drawing before electrical data is applied.

Verified Reference Points

1. TDIL01 digital-input termination family
2. Complete prefix/part traceability
3. Project-specific IOM matching
4. Channel-level commissioning control

Signal / System Function

24 VDC discrete input service is associated with the TDIL01 family; exact DC-prefix range and approval data must follow the controlled drawing.
