Workflow and system context

General Electric DS200TCPSGIARE is an evidence-bounded Mark V installed-base board. System role: Use this page to reconcile the exact installed Mark V board label and project documentation before service work.

- | | |
|----|--|
| 01 | System Inputs: Use this page to reconcile the exact installed Mark V board label and project documentation before service work. |
| 02 | Processing: GE Vernova states that Mark V is no longer produced and has limited refurbished, repair and exchange support; exact board revision and migration applicability remain site-specific. |

Published context and boundaries

- | | |
|----|---|
| 01 | Verify the complete DS200TCPSGIARE label, Mark V rack position, cable and project drawings before use. |
| 02 | Do not transfer ratings, terminal assignments or compatibility from another TCPS suffix. The full DS200TCPSGIARE label must match the installed unit. |
| 03 | Origin, HS code, dimensions and logistics weight remain unpublished without exact manufacturer model-level evidence. |

Verification and release checks

01	Verify the complete DS200TCPSGIARE label, Mark V rack position, cable and project drawings before use.
02	Do not transfer ratings, terminal assignments or compatibility from another TCPS suffix. The full DS200TCPSGIARE label must match the installed unit.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, network, I/O and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model, suffix or successor.

Identity and release controls

Verification Status	Verified Requested Label With Official Base Family Boundary
