

MANUFACTURER-SOURCE TECHNICAL REFERENCE

General Electric IC697ALG320

IC697ALG320 Label Verification Product Information Manual

General Electric IC697ALG320 Label Verification Official-Source Product Reference

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited General Electric manufacturer sources. No product photograph is included.

Product / lookup identity	General Electric IC697ALG320
Reference number	IC697ALG320
Document basis	Published General Electric product records, PDFs, and manuals listed on page 3

Workflow and system context

General Electric IC697ALG320 is an evidence-bounded Series 90-70 analog-module migration reference. System role: Use this page to verify the installed Series 90-70 module and plan a controlled migration using the exact GFK-2793 wiring conversion for the site.

- | | |
|----|--|
| 01 | System Inputs: Use this page to verify the installed Series 90-70 module and plan a controlled migration using the exact GFK-2793 wiring conversion for the site. |
| 02 | Processing: Emerson's Conversion Rack passes Series 90-70 field wiring into RX3i with model-specific conversion configurations and explicitly requires pre-engineered wiring verification. |

Published context and boundaries

- | | |
|----|--|
| 01 | Verify IC697ALG320, the exact GFK-2793 revision, terminal mapping, replacement module and conversion drawing before migration or service. |
| 02 | Do not publish voltage/current ranges, resolution or IC695ALG704/708 replacement claims without the exact official GFK-2793 revision and project conversion drawing. |
| 03 | Origin, HS code, dimensions and logistics weight remain unpublished without exact manufacturer model-level evidence. |

Verification and release checks

01	Verify IC697ALG320, the exact GFK-2793 revision, terminal mapping, replacement module and conversion drawing before migration or service.
02	Do not publish voltage/current ranges, resolution or IC695ALG704/708 replacement claims without the exact official GFK-2793 revision and project conversion drawing.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, network, I/O and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model, suffix or successor.

Identity and release controls

Verification Status	Verified Exact Model In Migration Context Technical Ratings Hold
