

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB DCP02 P37211-4-0369654

DCP02 P37211-4-0369654 Product Information Manual

ABB DCP02 P37211-4-0369654 Official-Source Product Reference

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited ABB manufacturer sources. No product photograph is included.

Product / lookup identity	ABB DCP02 P37211-4-0369654
Reference number	P37211-4-0369654
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Workflow and system context

ABB DCP02 P37211-4-0369654 is an evidence-bounded legacy Freelance rack CPU module. System role: DCP02 executes the control application and exchanges data with intelligent Freelance rack I/O.

01	System Inputs: DCP02 executes the control application and exchanges data with intelligent Freelance rack I/O.
02	Processing: ABB states that classic rack controllers DCP02 and DCP10 are engineered with Control Builder F; rack CPUs use the rack I/O architecture and do not directly access fieldbus I/O or intelligent field devices.

Published context and boundaries

01	Verify DCP02, P37211-4-0369654, firmware, rack, power and project backup before use.
02	Do not merge DCP02 with DCP10 or infer processor, memory, firmware or electrical ratings from third-party listings.
03	Origin, HS code, dimensions and logistics weight remain unpublished without exact ABB model-level evidence.

Verification and release checks

01	Verify DCP02, P37211-4-0369654, firmware, rack, power and project backup before use.
02	Do not merge DCP02 with DCP10 or infer processor, memory, firmware or electrical ratings from third-party listings.
03	De-energize the rack and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up Freelance configuration and controller data before replacement or migration work.
05	Verify every rack slot, companion module, system cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model, suffix or successor.

Identity and release controls

Verification Status	Verified Dcp02 Family With Existing Part Label Gate
