

07ZE63R302 GJV3074323R302

Procontic T200 central unit

The 07ZE63R302 GJV3074323R302 is an ABB Procontic T200 central unit. It executes the T200 application and manages its installed companion modules.

Manufacturer	ABB / Elsas Bailey
Complete model	07ZE63R302 GJV3074323R302
Product description	Procontic T200 central unit
Prepared by	Apter Power
Document ID	AP-ABB-07ZE63R302 GJV3074323R302-PR-R1
Revision / issue	R1 / 2026-08-26

1. Product overview and identity

The 07ZE63R302 GJV3074323R302 is an ABB Procontic T200 central unit. It executes the T200 application and manages its installed companion modules.

System function

Executes the T200 application and manages its installed companion modules.

Verified technical information

Parameter	Verified value
Manufacturer	ABB
Complete model	07ZE63R302 GJV3074323R302
Verified product description	Procontic T200 central unit
System function	executes the T200 application and manages its installed companion modules
Direct field signals	See exact manufacturer manual and installed-system drawings
Revision / option status	Verify complete physical nameplate
Unpublished values	Not inferred

2. Integration and verification

Signals and data handled

Signal types and electrical ratings are defined by the cited manufacturer document and the installed-system configuration. Values not stated for this exact complete identifier are intentionally omitted.

Companion components

Use only the controller, rack, terminal unit, cable, sensor, actuator or power components explicitly documented for the installed ABB system and revision.

Common industrial applications

Industrial automation, process control, machinery, utilities or robotics installations using the named ABB product family; exact use depends on the approved system design.

Product precautions

- Match the complete model, order code, revision and physical construction before installation or replacement.
- Use only the electrical ratings, wiring and environmental limits stated in the applicable ABB document.
- Record the existing configuration and test every affected signal, communication path and safety function before release.

Manufacturer source PDFs
