

AV31 AV 31

ABB H&B Contronic module

The AV31 AV 31 is an ABB ABB H&B Contronic module. It performs a system-specific Contronic function that must be confirmed from the installed module documentation.

Manufacturer	ABB / Elsas Bailey
Complete model	AV31 AV 31
Product description	ABB H&B Contronic module
Prepared by	Apter Power
Document ID	AP-ABB-AV31 AV 31-PR-R1
Revision / issue	R1 / 2026-08-26

AV31 AV 31

1. Product overview and identity

The AV31 AV 31 is an ABB ABB H&B Contronic module. It performs a system-specific Contronic function that must be confirmed from the installed module documentation.

System function

Performs a system-specific Contronic function that must be confirmed from the installed module documentation.

Verified technical information

Parameter	Verified value
Manufacturer	ABB
Complete model	AV31 AV 31
Verified product description	ABB H&B Contronic module
System function	performs a system-specific Contronic function that must be confirmed from the installed module documentation
Direct field signals	See exact manufacturer manual and installed-system drawings
Revision / option status	Verify complete physical nameplate
Unpublished values	Not inferred

2. Integration and verification

Signals and data handled

Signal types and electrical ratings are defined by the cited manufacturer document and the installed-system configuration. Values not stated for this exact complete identifier are intentionally omitted.

Companion components

Use only the controller, rack, terminal unit, cable, sensor, actuator or power components explicitly documented for the installed ABB system and revision.

Common industrial applications

Industrial automation, process control, machinery, utilities or robotics installations using the named ABB product family; exact use depends on the approved system design.

Product precautions

- The accessible ABB material does not establish a complete functional specification for this exact identifier; obtain the product-specific ABB record or nameplate before use.
- Match the complete model, order code, revision and physical construction before installation or replacement.
- Use only the electrical ratings, wiring and environmental limits stated in the applicable ABB document.
- Record the existing configuration and test every affected signal, communication path and safety function before release.

Manufacturer source PDFs
