

1SAR330020R0000

C565 multifunction time relay

The 1SAR330020R0000 is an ABB C565 multifunction time relay. It applies selectable timing functions to two changeover output contacts in industrial control circuits.

Manufacturer	ABB / Elsas Bailey
Complete model	1SAR330020R0000
Product description	C565 multifunction time relay
Prepared by	Apter Power
Document ID	AP-ABB-1SAR330020R0000-PR-R1
Revision / issue	R1 / 2026-08-26

1. Product overview and identity

The 1SAR330020R0000 is an ABB C565 multifunction time relay. It applies selectable timing functions to two changeover output contacts in industrial control circuits.

System function

Applies selectable timing functions to two changeover output contacts in industrial control circuits.

Verified technical information

Parameter	Verified value
Manufacturer	ABB
Complete model	1SAR330020R0000
Verified product description	C565 multifunction time relay
System function	applies selectable timing functions to two changeover output contacts in industrial control circuits
Direct field signals	See exact manufacturer manual and installed-system drawings
Revision / option status	Verify complete physical nameplate
Unpublished values	Not inferred

2. Integration and verification

Signals and data handled

Signal types and electrical ratings are defined by the cited manufacturer document and the installed-system configuration. Values not stated for this exact complete identifier are intentionally omitted.

Companion components

Use only the controller, rack, terminal unit, cable, sensor, actuator or power components explicitly documented for the installed ABB system and revision.

Common industrial applications

Industrial automation, process control, machinery, utilities or robotics installations using the named ABB product family; exact use depends on the approved system design.

Product precautions

- Match the complete model, order code, revision and physical construction before installation or replacement.
- Use only the electrical ratings, wiring and environmental limits stated in the applicable ABB document.
- Record the existing configuration and test every affected signal, communication path and safety function before release.

Manufacturer source PDFs
