Workflow and system context

Honeywell 10201/2/1 is an eight-channel, 24 VDC fail-safe digital output module for the FSC system. Use 10201/2/1 only with the exact host, rack or chassis, terminal hardware, cable and project configuration specified for the installed system.

01	System Inputs: FSC fail-safe digital output module
02	Processing: Use 10201/2/1 only with the exact host, rack or chassis, terminal hardware, cable and project configuration specified for the installed system.

Published context and boundaries

01	Use 10201/2/1 only with the exact host, rack or chassis, terminal hardware, cable and project configuration specified for the installed system.
02	Lifecycle evidence boundary: Use the cited model-level lifecycle statement where supplied.
03	Verify the complete Honeywell 10201/2/1 physical label before use.

Verification and release checks

01	Verify the complete Honeywell 10201/2/1 physical label before use.
02	Use 10201/2/1 only with the exact host, rack or chassis, terminal hardware, cable and project configuration specified for the installed system.
03	Confirm the exact rack or chassis position, terminal assembly, cable, connector, power and project revision.
04	De-energize the equipment unless the exact hardware manual and site procedure explicitly permit energized service.
05	Back up controller, communication and I/O configuration before replacement or migration work.
06	Do not transfer electrical, communication or mechanical values from a related model or different suffix.
