

MANUFACTURER-SOURCE TECHNICAL REFERENCE

General Electric IS200TRLYH1BED

IS200TRLYH1BED Product Information Manual

General Electric IS200TRLYH1BED Official-Source Product Reference

DOCUMENT SCOPE

Independent Apter Power manual compiled only from the cited General Electric manufacturer sources. No product photograph is included.

Product / lookup identity	General Electric IS200TRLYH1BED
Reference number	IS200TRLYH1BED
Document basis	Published General Electric product records, PDFs, and manuals listed on page 3

Workflow and system context

General Electric IS200TRLYHIBED is an evidence-bounded Mark VIe relay terminal-board revision. System role: The verified TRLYHIB base is a relay-board family used with documented PDOA I/O packs in Mark VIe architectures.

- | | |
|----|---|
| 01 | System Inputs: The verified TRLYHIB base is a relay-board family used with documented PDOA I/O packs in Mark VIe architectures. |
| 02 | Processing: Use only the exact compatible I/O pack quantity, board revision and project wiring defined by GE Vernova documentation and the installed panel. |

Published context and boundaries

- | | |
|----|---|
| 01 | Match the complete IS200TRLYHIBED suffix, PDOA pack, panel wiring and GE project documentation; do not substitute IS200TRLYHIBGF. |
| 02 | Do not merge IS200TRLYHIBED with IS200TRLYHIBGF ID 854607 or transfer revision-specific relay counts, ratings or approvals. |
| 03 | Origin, HS code, dimensions and logistics weight remain unpublished without exact manufacturer model-level evidence. |

Verification and release checks

01	Match the complete IS200TRLYHIBED suffix, PDOA pack, panel wiring and GE project documentation; do not substitute IS200TRLYHIBGF.
02	Do not merge IS200TRLYHIBED with IS200TRLYHIBGF ID 854607 or transfer revision-specific relay counts, ratings or approvals.
03	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
04	Back up controller, network, I/O and configuration data before replacement, migration or firmware work.
05	Verify every companion module, cable, connector, termination and power source from approved drawings.
06	Do not copy electrical, communication, mechanical or lifecycle values from a related model, suffix or successor.

Identity and release controls

Verification Status	Verified TrlyhIB Base With Full Suffix Nameplate Gate
---------------------	---
