

MANUFACTURER-SOURCE TECHNICAL REFERENCE

ABB DSCA125A 57520001-CY

DSCA125A 57520001-CY Verification Product Information Manual

ABB requested ABB legacy board and part-label verification reference product reference

DOCUMENT SCOPE

Independent Apter Power manual limited to verified identity evidence and any directly relevant ABB sources listed in this document. No product photograph is included.

Product / lookup identity	ABB DSCA125A 57520001-CY
Reference number	DSCA125A 57520001-CY
Document basis	Published ABB product records, PDFs, and manuals listed on page 3

Workflow and system context

ABB DSCAI25A is an evidence-bounded requested ABB legacy board and part-label verification reference. Compatibility boundary: Do not infer communication protocol, port count, cable, rack or replacement from DSCA-family names or third-party listings.

- | | |
|----|---|
| 01 | System Inputs: requested ABB legacy board and part-label verification reference |
| 02 | Processing: Do not infer communication protocol, port count, cable, rack or replacement from DSCA-family names or third-party listings. |

Published context and boundaries

- | | |
|----|--|
| 01 | DSCAI25A and 57520001-CY are preserved exactly for identification; no directly relevant ABB-hosted model document was found. |
| 02 | Do not infer communication protocol, port count, cable, rack or replacement from DSCA-family names or third-party listings. |
| 03 | Country of origin, HS code, dimensions and logistics weight remain unpublished without exact ABB model-level evidence. |

Verification and release checks

01	Verify the complete ABB DSCAI25A label and requested part number before use.
02	Do not infer communication protocol, port count, cable, rack or replacement from DSCA-family names or third-party listings.
03	Confirm the exact host controller, rack position, terminal unit, cable, connector, firmware and project revision.
04	De-energize the equipment and follow the site's approved electrical and process-safety procedure before disturbing hardware or wiring.
05	Back up controller, communication and I/O configuration before replacement or migration work.
06	Do not transfer channels, ranges, voltage, current, communication, mechanical or lifecycle values from a sibling, predecessor or successor.

Identity and release controls

Verification Status	Requested Label Only
---------------------	----------------------

Official ABB sources

Source-link status	No directly relevant official manufacturer source link was found for this exact requested identity. Unrelated and third-party links are intentionally omitted.
