

51202330-200

Application and Configuration Guide | C300 Memory-Backup Cable, 84 in

Honeywell 51202330-200 is the 84-inch cable used between a memory-backup assembly and one C300 Controller. It is part of the Series 8 C300 controller memory-backup arrangement.

Application features

- Memory-backup assembly connection
- One-controller cable assignment
- Series 8 C300 hardware application
- Extended routing option for cabinet layout

Use and configuration

Use the cable in the documented C300 memory-backup arrangement. The selected route must match the RAM charger location, controller IOTA position and approved cabinet wiring layout.

Pre-use verification

1	Isolate the applicable controller memory-backup connection as required by the site procedure.
2	Confirm the 51202330-200 label and the intended MBA-to-C300 connection.
3	Route the cable without strain, pinch points or interference with cabinet service access.
4	Restore power and verify the memory-backup status using the approved controller procedure.

Important Notice: Verify the 51202330-200 label, both end connections, RAM charger assembly, C300 IOTA position and cable routing before applying or restoring system power.
