

INDUSTRIAL AUTOMATION PRODUCT

IC670GBI001

GE Fanuc Field Control Genius Bus Interface Unit

Bidirectional Genius network data, configuration and diagnostic traffic

IDENTITY	VERIFIED VALUE
Manufacturer	GE
System family	GE Fanuc Field Control distributed I/O
Part number	IC670GBI001
Country	USA
HS code	8537101190

Technical Specifications

Technical values below are limited to the named GE product record.

PARAMETER	TECHNICAL VALUE
Catalog number	IC670GBI001
Network	Genius bus
Station capacity	Up to 8 Field Control I/O modules
Input data capacity	Up to 128 bytes
Output data capacity	Up to 128 bytes
Bus devices per network	Up to 32
Supported station device numbers	0 to 31
Terminal block mounting	35 x 7.5 mm DIN rail
Host data interface	Genius global data and directed control data

ENGINEERING DATA SUMMARY

DATA GROUP	VERIFIED ASSIGNMENT
Installed host / carrier	Genius network
Companion hardware	Field Control terminal block
Field connection	Up to eight compatible I/O modules
Primary system function	Connects the station to Genius
Controlled acceptance duty	Genius bus interface field station

3

System Role and Architecture

Bidirectional Genius network data, configuration and diagnostic traffic

FUNCTION 1

Connects the station to Genius

FUNCTION 2

Supports up to eight Field Control I/O modules

FUNCTION 3

Exchanges configured input and output data with the host

FUNCTION 4

Provides station and module diagnostic access

Matched system components

- Genius network
- Field Control terminal block
- Up to eight compatible I/O modules
- installed GE Fanuc Field Control power supply

SYSTEM INTEGRATION RECORD

INTEGRATION ITEM	DOCUMENTED ROLE
Installed host / carrier	Genius network
Companion hardware	Field Control terminal block
Field connection	Up to eight compatible I/O modules
Primary system function	Connects the station to Genius
Controlled acceptance duty	Genius bus interface field station

4

Applications and Engineering Context

Genius bus interface field station

Connects the station to Genius

Remote I/O cabinet integration

Supports up to eight Field Control I/O modules

Installed-base module renewal

Exchanges configured input and output data with the host

Controlled commissioning and diagnostics

Provides station and module diagnostic access

TECHNICAL NOTE

Confirm IC670GBI001, installed GE Fanuc Field Control power supply, network address, bus termination and the configured I/O map before connecting the station to the host.

MODEL-SPECIFIC ACCEPTANCE EVIDENCE

CHECK	ACCEPTANCE CONDITION
Identity	IC670GBI001 / IC670GBI001 recorded
Physical interface	Genius network
Companion check	Field Control terminal block
Functional proof	Connects the station to Genius
Application test	Genius bus interface field station

5

Engineering Precautions

- 1 Verify the complete IC670GBI001 catalog marking and assigned Field Control position before work.
- 2 Place the connected Genius process in its approved maintenance state before disturbing the station.
- 3 Isolate BIU and field power, then confirm a safe condition at the IC670GBI001 terminal block.
- 4 Label and record network conductors, shield, termination and field-power wiring before disconnecting any conductor from IC670GBI001.
- 5 Use ESD controls and protect the module connector, terminal block keying and exposed electronics.
