Engineering Precautions

1

Verify 32000-28-05-08-080-03-02, 80 mm standoff and 80 mm penetration before work.

2

Place the monitored machine and protection channel in the approved maintenance state.

3

Preserve the 3/4-14 NPT machine-case thread and established housing orientation.

4

Record probe gap, sleeve position, cable route, fitting and grommet selection before removal.

5

Protect the conductive PPS cover, sleeve bore, probe tip and seals from impact or contamination.
