

INDUSTRIAL AUTOMATION PRODUCT

ATV930C11N4

Altivar Process ATV930 110 kW Variable Speed Drive

Schneider Electric ATV930C11N4 is an Altivar Process ATV930 variable speed drive rated 110 kW for 380–480 V three-phase supplies. It includes a braking unit and provides embedded power measurement, process monitoring and asset-protection functions.

CONTROLLED ENGINEERING COPY

IDENTITY	VERIFIED VALUE
Manufacturer	Schneider Electric
System family	Altivar Process ATV900
Part number	ATV930C11N4
Document status	Controlled product and system reference

DOCUMENT SCOPE

Exact article identity, official technical data, host matching, installation checks, applications, precautions and controlled acceptance evidence.

MODEL-SPECIFIC ENGINEERING NOTE

Install ATV930C11N4 only in the documented Altivar Process ATV900 position and preserve its exact wiring, interfaces and configuration. After controlled energization, verify diagnostics and variable-speed control of synchronous, asynchronous or reluctance motors in process applications before service release.

System Role and Architecture

Schneider Electric ATV930C11N4 is an Altivar Process ATV930 variable speed drive rated 110 kW for 380–480 V three-phase supplies. It includes a braking unit and provides embedded power measurement, process monitoring and asset-protection functions.

FUNCTION 1
ATV930 110 kW process drive

FUNCTION 2
380–480 V three-phase supply

FUNCTION 3
Integrated braking unit

FUNCTION 4
Embedded energy and process monitoring

MATCHED SYSTEM COMPONENTS

NO.	DOCUMENTED COMPONENT / ROLE
01	Altivar Process ATV900
02	Matched Altivar Process ATV900 host or field system
03	Documented power, signal, communication and protective interfaces
04	Approved engineering configuration and acceptance record

SYSTEM INTEGRATION RECORD

INTEGRATION ITEM	DOCUMENTED ROLE
Host identity	Altivar Process ATV900
Interface role	variable-speed control of synchronous, asynchronous or reluctance motors in process applications
Field / power context	documented Altivar Process ATV900 installation
Commissioning evidence	Identity, wiring, configuration, diagnostics and controlled response recorded

INSTALLATION AND CONNECTION CHECKS

- 1

Confirm the complete ATV930C11N4 marking and the documented Altivar Process ATV930 110 kW Variable Speed Drive execution.
- 2

Place the machine, controller and affected process in the approved maintenance state.
- 3

Isolate all hazardous energy and prove the safe state before disconnecting hardware.
- 4

Record the installed position, every terminal or port, and the active engineering configuration.

Technical Specifications

Technical values below are limited to the named product record and directly applicable manufacturer documentation.

PARAMETER	VALUE	PARAMETER	VALUE
Product range	Altivar Process ATV900	Embedded power measurement	Provided
Product series	ATV930	Energy dashboard	Provided
Drive type	Variable speed drive	Process monitoring and control	Embedded
Motor power rating	110 kW	Stop and Go energy function	Provided
Supply voltage range	380 to 480 V AC	Asset monitoring and protection	Provided
Supply phases	3 phase	Drift monitoring	Provided
Braking unit	Included

ENGINEERING BOUNDARY

Confirm ATV930C11N4, its exact Altivar Process ATV900 host, power source, installed position, interfaces, configuration, diagnostics and controlled acceptance evidence before release.

PRE-INSTALLATION CHECKS

- 1

Confirm the complete ATV930C11N4 marking and the documented Altivar Process ATV930 110 kW Variable Speed Drive execution.
- 2

Place the machine, controller and affected process in the approved maintenance state.
- 3

Isolate all hazardous energy and prove the safe state before disconnecting hardware.
- 4

Record the installed position, every terminal or port, and the active engineering configuration.

Applications and Engineering Context

Pump speed control

Matches motor speed to the documented process demand.

Fan and ventilation control

Adjusts airflow while retaining configured protection and energy monitoring.

Process-drive replacement

Restores motor, supply, braking and control assignments.

Energy and asset monitoring

Uses embedded dashboards and diagnostics for controlled operation.

TECHNICAL NOTE

Install ATV930C11N4 only in the documented Altivar Process ATV900 position and preserve its exact wiring, interfaces and configuration. After controlled energization, verify diagnostics and variable-speed control of synchronous, asynchronous or reluctance motors in process applications before service release.

MODEL-SPECIFIC ACCEPTANCE EVIDENCE

CHECK	ACCEPTANCE CONDITION
Identity	ATV930C11N4 recorded
Host / carrier	Altivar Process ATV900
Physical interface	Installed terminals, ports and signal paths matched to the as-found record
Configuration	Approved hardware and engineering configuration restored
Functional proof	Controlled test confirms variable-speed control of synchronous, asynchronous or reluctance motors in process applications

IMPORTANT NOTICE

Confirm ATV930C11N4, its exact Altivar Process ATV900 host, power source, installed position, interfaces, configuration, diagnostics and controlled acceptance evidence before release.
