

1P00028G01

I/O Transition Panel

Westinghouse 1P00028G01 is an Ovation remote-node local I/O transition panel. It provides the documented transition-panel position between remote I/O field connections and the Ovation control-system arrangement.

IDENTITY	VERIFIED VALUE
Manufacturer	Westinghouse
Complete model	1P00028G01
Product role	I/O Transition Panel
System family	Ovation Remote I/O

Document scope

Exact identity, verified technical data, applications, precautions, model-specific FAQ and controlled acceptance records.

Technical Specifications

PARAMETER	VERIFIED VALUE
Product identity	1P00028G01
Product type	Local I/O transition panel
Control platform	Ovation

PARAMETER	VERIFIED VALUE
Node application	Remote node
Hardware form	PC-board assembly / transition panel
Installation control	Match branch, node, slot and revision records

Engineering boundary

Verify the complete Westinghouse 1P00028G01 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Identity Acceptance

CONTROL	VERIFIED VALUE
Product identity	1P00028G01
Product type	Local I/O transition panel
Control platform	Ovation
Node application	Remote node

Functions and Applications

Product type

The reviewed exact-model records support product type: Local I/O transition panel.

Control platform

The reviewed exact-model records support control platform: Ovation.

Node application

The reviewed exact-model records support node application: Remote node.

Hardware form

The reviewed exact-model records support hardware form: PC-board assembly / transition panel.

Common Applications

APPLICATION	ENGINEERING CONTEXT
I/O Transition Panel service	Supports controlled maintenance of the installed 1P00028G01 hardware position.
Exact-model replacement	Preserves the complete 1P00028G01 identity during spare selection and incoming inspection.
Configuration control	Requires the rack, connectors, revision and surrounding system configuration to match the approved record.
Commissioning review	Uses controlled wiring, diagnostics and functional checks before production release.

Controlled acceptance duty

Confirm identity, interfaces, configured values and functional response against the installed-system record before release.

Engineering Precautions

NO.	PRECAUTION
1	Verify the complete Westinghouse 1P00028G01 marking before work.
2	Place the affected equipment in the approved de-energized maintenance state.
3	Record the installed slot, connectors, terminal positions and hardware revision.
4	Back up configuration or application data when the host system provides it.
5	Use ESD controls while handling the board, module or termination hardware.
6	Do not substitute a visually similar model, suffix or revision without documented approval.
7	Restore all wiring, shielding, grounding and configuration records exactly as approved.
8	Complete model-specific diagnostics and functional checks for 1P00028G01 before release.

Model-Specific FAQ - Part 1

QUESTION	ANSWER
What is Westinghouse 1P00028G01?	1P00028G01 is the i/o transition panel identified by the verified exact-model records.
Which product type is confirmed for 1P00028G01?	The retained product type is Local I/O transition panel.
Which system context applies to 1P00028G01?	The confirmed context is Ovation Remote I/O; the installed rack and revision still require verification.
Which exact-model value should be checked first for 1P00028G01?	Check control platform: Ovation together with the complete nameplate marking.

Model-Specific FAQ - Part 2

QUESTION	ANSWER
What additional technical fact is verified for 1P00028G01?	The reviewed records support node application: Remote node.
Can a similar-looking part replace 1P00028G01?	No. Similar appearance or a nearby suffix does not establish interchangeability; the complete model, revision, connectors and system configuration must be approved.
What should be recorded before removing 1P00028G01?	Record the full marking, installed position, connector or terminal arrangement, revision, wiring and current configuration.
What confirms successful commissioning of 1P00028G01?	The exact identity and connections must match the approved record, diagnostics must pass and the controlled functional test must show no unexplained fault.
