

S-D4008-A-S-D4008

Rack Control Module

Reliance Electric S-D4008-A / S-D4008 is a rack-mounted control module associated with AutoMax control hardware. Selection requires the complete model marking and a match to the installed rack, connectors and hardware revision.

IDENTITY	VERIFIED VALUE
Manufacturer	Reliance Electric
Complete model	S-D4008-A-S-D4008
Product role	Rack Control Module
System family	AutoMax Control Hardware

Document scope

Exact identity, verified technical data, applications, precautions, model-specific FAQ and controlled acceptance records.

Functions and Applications

Product type The reviewed exact-model records support product type: Rack-mounted control module.	System association The reviewed exact-model records support system association: Reliance Electric AutoMax control hardware.
Installation form The reviewed exact-model records support installation form: Rack mount.	Compatibility control The reviewed exact-model records support compatibility control: Exact rack, connector and revision match required.

Common Applications

APPLICATION	ENGINEERING CONTEXT
Rack Control Module service	Supports controlled maintenance of the installed S-D4008-A-S-D4008 hardware position.
Exact-model replacement	Preserves the complete S-D4008-A-S-D4008 identity during spare selection and incoming inspection.
Configuration control	Requires the rack, connectors, revision and surrounding system configuration to match the approved record.
Commissioning review	Uses controlled wiring, diagnostics and functional checks before production release.

Controlled acceptance duty

Confirm identity, interfaces, configured values and functional response against the installed-system record before release.

Engineering Precautions

NO.	PRECAUTION
1	Verify the complete Reliance Electric S-D4008-A-S-D4008 marking before work.
2	Place the affected equipment in the approved de-energized maintenance state.
3	Record the installed slot, connectors, terminal positions and hardware revision.
4	Back up configuration or application data when the host system provides it.
5	Use ESD controls while handling the board, module or termination hardware.
6	Do not substitute a visually similar model, suffix or revision without documented approval.
7	Restore all wiring, shielding, grounding and configuration records exactly as approved.
8	Complete model-specific diagnostics and functional checks for S-D4008-A-S-D4008 before release.

Model-Specific FAQ - Part 1

QUESTION	ANSWER
What is Reliance Electric S-D4008-A-S-D4008?	S-D4008-A-S-D4008 is the rack control module identified by the verified exact-model records.
Which product type is confirmed for S-D4008-A-S-D4008?	The retained product type is Rack-mounted control module.
Which system context applies to S-D4008-A-S-D4008?	The confirmed context is AutoMax Control Hardware; the installed rack and revision still require verification.
Which exact-model value should be checked first for S-D4008-A-S-D4008?	Check system association: Reliance Electric AutoMax control hardware together with the complete nameplate marking.

Model-Specific FAQ - Part 2

QUESTION	ANSWER
What additional technical fact is verified for S-D4008-A-S-D4008?	The reviewed records support installation form: Rack mount.
Can a similar-looking part replace S-D4008-A-S-D4008?	No. Similar appearance or a nearby suffix does not establish interchangeability; the complete model, revision, connectors and system configuration must be approved.
What should be recorded before removing S-D4008-A-S-D4008?	Record the full marking, installed position, connector or terminal arrangement, revision, wiring and current configuration.
What confirms successful commissioning of S-D4008-A-S-D4008?	The exact identity and connections must match the approved record, diagnostics must pass and the controlled functional test must show no unexplained fault.
