

R15E02A186

PC Board Module

Siemens R15E02A186 is a discontinued industrial PC-board module with screw-terminal connections. Confirm the complete board marking, terminal arrangement and installed hardware revision before replacement.

IDENTITY	VERIFIED VALUE
Manufacturer	Siemens
Complete model	R15E02A186
Product role	PC Board Module
System family	Legacy Control Hardware

Document scope

Exact identity, verified technical data, applications, precautions, model-specific FAQ and controlled acceptance records.

Technical Specifications

PARAMETER	VERIFIED VALUE	PARAMETER	VERIFIED VALUE
Product identity	R15E02A186 / R15E02-A186	Lifecycle status	Discontinued
Product type	Industrial PC-board module	Installation control	Match board marking, terminals and revision
Connection type	Screw terminals		

Engineering boundary

Verify the complete Siemens R15E02A186 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Identity Acceptance

CONTROL	VERIFIED VALUE
Product identity	R15E02A186 / R15E02-A186
Product type	Industrial PC-board module
Connection type	Screw terminals
Lifecycle status	Discontinued

Functions and Applications

Product type The reviewed exact-model records support product type: Industrial PC-board module.	Connection type The reviewed exact-model records support connection type: Screw terminals.
Lifecycle status The reviewed exact-model records support lifecycle status: Discontinued.	Installation control The reviewed exact-model records support installation control: Match board marking, terminals and revision.

Common Applications

APPLICATION	ENGINEERING CONTEXT
PC Board Module service	Supports controlled maintenance of the installed R15E02A186 hardware position.
Exact-model replacement	Preserves the complete R15E02A186 identity during spare selection and incoming inspection.
Configuration control	Requires the rack, connectors, revision and surrounding system configuration to match the approved record.
Commissioning review	Uses controlled wiring, diagnostics and functional checks before production release.

Controlled acceptance duty Confirm identity, interfaces, configured values and functional response against the installed-system record before release.

Engineering Precautions

NO.	PRECAUTION
1	Verify the complete Siemens R15E02A186 marking before work.
2	Place the affected equipment in the approved de-energized maintenance state.
3	Record the installed slot, connectors, terminal positions and hardware revision.
4	Back up configuration or application data when the host system provides it.
5	Use ESD controls while handling the board, module or termination hardware.
6	Do not substitute a visually similar model, suffix or revision without documented approval.
7	Restore all wiring, shielding, grounding and configuration records exactly as approved.
8	Complete model-specific diagnostics and functional checks for R15E02A186 before release.

Model-Specific FAQ - Part 1

QUESTION	ANSWER
What is Siemens R15E02A186?	R15E02A186 is the pc board module identified by the verified exact-model records.
Which product type is confirmed for R15E02A186?	The retained product type is Industrial PC-board module.
Which system context applies to R15E02A186?	The confirmed context is Legacy Control Hardware; the installed rack and revision still require verification.
Which exact-model value should be checked first for R15E02A186?	Check connection type: Screw terminals together with the complete nameplate marking.

Model-Specific FAQ - Part 2

QUESTION	ANSWER
What additional technical fact is verified for R15E02A186?	The reviewed records support lifecycle status: Discontinued.
Can a similar-looking part replace R15E02A186?	No. Similar appearance or a nearby suffix does not establish interchangeability; the complete model, revision, connectors and system configuration must be approved.
What should be recorded before removing R15E02A186?	Record the full marking, installed position, connector or terminal arrangement, revision, wiring and current configuration.
What confirms successful commissioning of R15E02A186?	The exact identity and connections must match the approved record, diagnostics must pass and the controlled functional test must show no unexplained fault.
