

Installation Identity and Scope

Reliance Electric S-D4008-A / S-D4008 is a rack-mounted control module associated with AutoMax control hardware. Selection requires the complete model marking and a match to the installed rack, connectors and hardware revision.

INSTALLATION IDENTITY	REQUIRED VALUE
Complete model	S-D4008-A-S-D4008
Manufacturer	Reliance Electric
Hardware role	Rack Control Module
System family	AutoMax Control Hardware

Controlled engineering copy

Verify the complete Reliance Electric S-D4008-A-S-D4008 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Pre-Installation Plan

NO.	REQUIRED ACTION
1	Verify the complete Reliance Electric S-D4008-A-S-D4008 marking before work.
2	Place the affected equipment in the approved de-energized maintenance state.
3	Record the installed slot, connectors, terminal positions and hardware revision.
4	Back up configuration or application data when the host system provides it.
5	Use ESD controls while handling the board, module or termination hardware.
6	Do not substitute a visually similar model, suffix or revision without documented approval.
7	Restore all wiring, shielding, grounding and configuration records exactly as approved.
8	Complete model-specific diagnostics and functional checks for S-D4008-A-S-D4008 before release.

Before Energization

CONTROL	REQUIRED RECORD
Identity	Complete S-D4008-A-S-D4008 marking and hardware role
Connections	Approved power, grounding and protocol interfaces
Configuration	Controlled backup, addressing and protocol files
Test plan	Defined acceptance values and controlled restart authority

Release hold point

Do not disturb the installed device until exact marking, interfaces, companion hardware and configured function are documented.

Wiring, Network and Configuration Checks

CHECK	MODEL-SPECIFIC REQUIREMENT
System association	Reliance Electric AutoMax control hardware
Installation form	Rack mount
Compatibility control	Exact rack, connector and revision match required

Configuration boundary

Verify the complete Reliance Electric S-D4008-A-S-D4008 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Expected Technical Values

PARAMETER	VALUE
Product identity	S-D4008-A / S-D4008
Product type	Rack-mounted control module
System association	Reliance Electric AutoMax control hardware
Installation form	Rack mount

Commissioning and Acceptance

TEST	ACCEPTANCE CONDITION
Identity	Manufacturer and complete S-D4008-A-S-D4008 marking match the record.
Power	Measured supply agrees with the documented operating requirement.
Interface	Connectors, addressing and network parameters match the approved project.
Configuration	Protocol files, framing and mapped data areas match the controlled backup.
Diagnostics	No unexplained status, counter or communication fault remains.
Functional proof	Controlled bidirectional data transfer completes successfully.
Release	Final values and test results are retained with restart approval.

Questions to Resolve

QUESTION	ENGINEERING ANSWER
What is Reliance Electric S-D4008-A-S-D4008?	S-D4008-A-S-D4008 is the rack control module identified by the verified exact-model records.
Which product type is confirmed for S-D4008-A-S-D4008?	The retained product type is Rack-mounted control module.
