

Installation Identity and Scope

Westinghouse 1P00028G01 is an Ovation remote-node local I/O transition panel. It provides the documented transition-panel position between remote I/O field connections and the Ovation control-system arrangement.

INSTALLATION IDENTITY	REQUIRED VALUE
Complete model	1P00028G01
Manufacturer	Westinghouse
Hardware role	I/O Transition Panel
System family	Ovation Remote I/O

Controlled engineering copy

Verify the complete Westinghouse 1P00028G01 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Pre-Installation Plan

NO.	REQUIRED ACTION
1	Verify the complete Westinghouse 1P00028G01 marking before work.
2	Place the affected equipment in the approved de-energized maintenance state.
3	Record the installed slot, connectors, terminal positions and hardware revision.
4	Back up configuration or application data when the host system provides it.
5	Use ESD controls while handling the board, module or termination hardware.
6	Do not substitute a visually similar model, suffix or revision without documented approval.
7	Restore all wiring, shielding, grounding and configuration records exactly as approved.
8	Complete model-specific diagnostics and functional checks for 1P00028G01 before release.

Before Energization

CONTROL	REQUIRED RECORD
Identity	Complete 1P00028G01 marking and hardware role
Connections	Approved power, grounding and protocol interfaces
Configuration	Controlled backup, addressing and protocol files
Test plan	Defined acceptance values and controlled restart authority

Release hold point

Do not disturb the installed device until exact marking, interfaces, companion hardware and configured function are documented.

Wiring, Network and Configuration Checks

CHECK	MODEL-SPECIFIC REQUIREMENT
Control platform	Ovation
Node application	Remote node
Hardware form	PC-board assembly / transition panel
Installation control	Match branch, node, slot and revision records

Configuration boundary

Verify the complete Westinghouse 1P00028G01 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Expected Technical Values

PARAMETER	VALUE
Product identity	1P00028G01
Product type	Local I/O transition panel
Control platform	Ovation
Node application	Remote node

Commissioning and Acceptance

TEST	ACCEPTANCE CONDITION
Identity	Manufacturer and complete 1P00028G01 marking match the record.
Power	Measured supply agrees with the documented operating requirement.
Interface	Connectors, addressing and network parameters match the approved project.
Configuration	Protocol files, framing and mapped data areas match the controlled backup.
Diagnostics	No unexplained status, counter or communication fault remains.
Functional proof	Controlled bidirectional data transfer completes successfully.
Release	Final values and test results are retained with restart approval.

Questions to Resolve

QUESTION	ENGINEERING ANSWER
What is Westinghouse 1P00028G01?	1P00028G01 is the i/o transition panel identified by the verified exact-model records.
Which product type is confirmed for 1P00028G01?	The retained product type is Local I/O transition panel.

Controlled Release Summary

RELEASE ITEM	REQUIRED EVIDENCE
Identity	1P00028G01 recorded
Interface	Connections and companion hardware verified
Configuration	Installed values agree with approved record
Functional proof	Controlled test completed without unexplained fault
