

1P00028G01

I/O Transition Panel

Westinghouse 1P00028G01 is an Ovation remote-node local I/O transition panel. It provides the documented transition-panel position between remote I/O field connections and the Ovation control-system arrangement.

IDENTITY	VERIFIED VALUE
Manufacturer	Westinghouse
Complete model	1P00028G01
Product role	I/O Transition Panel
System family	Ovation Remote I/O

1P00028G01

Product Overview

System function

Westinghouse 1P00028G01 is an Ovation remote-node local I/O transition panel. It provides the documented transition-panel position between remote I/O field connections and the Ovation control-system arrangement.

Product type

The reviewed exact-model records support product type: Local I/O transition panel.

Control platform

The reviewed exact-model records support control platform: Ovation.

Node application

The reviewed exact-model records support node application: Remote node.

Hardware form

The reviewed exact-model records support hardware form: PC-board assembly / transition panel.

Technical note

Verify the complete Westinghouse 1P00028G01 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Technical Data and Acceptance

PARAMETER	VERIFIED VALUE	PARAMETER	VERIFIED VALUE
Product identity	1P00028G01	Node application	Remote node
Product type	Local I/O transition panel	Hardware form	PC-board assembly / transition panel
Control platform	Ovation	Installation control	Match branch, node, slot and revision records

Verify the complete Westinghouse 1P00028G01 marking, installed revision, connectors and system position before replacement. Confirm every retained value against the nameplate and controlled installation record before commissioning.

Applications and Engineering FAQ

APPLICATION	ENGINEERING CONTEXT
I/O Transition Panel service	Supports controlled maintenance of the installed 1P00028G01 hardware position.
Exact-model replacement	Preserves the complete 1P00028G01 identity during spare selection and incoming inspection.
Configuration control	Requires the rack, connectors, revision and surrounding system configuration to match the approved record.
Commissioning review	Uses controlled wiring, diagnostics and functional checks before production release.

Model-Specific FAQ - Part 1

QUESTION	ANSWER
What is Westinghouse 1P00028G01?	1P00028G01 is the i/o transition panel identified by the verified exact-model records.
Which product type is confirmed for 1P00028G01?	The retained product type is Local I/O transition panel.

FAQ, Related Products and Sources

QUESTION	ANSWER
Which system context applies to 1P00028G01?	The confirmed context is Ovation Remote I/O; the installed rack and revision still require verification.
Which exact-model value should be checked first for 1P00028G01?	Check control platform: Ovation together with the complete nameplate marking.
What additional technical fact is verified for 1P00028G01?	The reviewed records support node application: Remote node.
Can a similar-looking part replace 1P00028G01?	No. Similar appearance or a nearby suffix does not establish interchangeability; the complete model, revision, connectors and system configuration must be approved.
What should be recorded before removing 1P00028G01?	Record the full marking, installed position, connector or terminal arrangement, revision, wiring and current configuration.
What confirms successful commissioning of 1P00028G01?	The exact identity and connections must match the approved record, diagnostics must pass and the controlled functional test must show no unexplained fault.
