

PM632 3BSE005831R1

Processor Unit

ABB PM632 3BSE005831R1 is a processor unit for Advant Controller 110. ABB identifies the processor as an MC68000 operating at 16 MHz and lists a dedicated battery replacement kit.

IDENTITY	VERIFIED VALUE
Manufacturer	ABB
Complete model	PM632 3BSE005831R1
Product role	Processor Unit
System family	Advant Controller 110

PM632 3BSE005831R1

Product Overview

System function

ABB PM632 3BSE005831R1 is a processor unit for Advant Controller 110. ABB identifies the processor as an MC68000 operating at 16 MHz and lists a dedicated battery replacement kit.

Controller processing

Executes the documented Advant Controller 110 processor role.

MC68000 architecture

Uses the documented 16 MHz MC68000 processor.

Battery service path

Uses the listed GJR5146300R9 replacement kit.

Exact-item control

Combines PM632 and 3BSE005831R1 for controlled selection.

Technical note

Retain PM632 and 3BSE005831R1 as one item identity. Back up the controller application and installed hardware configuration before replacing the processor unit.

Technical Data and Acceptance

PARAMETER	VERIFIED VALUE	PARAMETER	VERIFIED VALUE
Product identity	PM632	Clock frequency	16 MHz
ABB item	3BSE005831R1	Battery replacement kit	GJR5146300R9
Product type	Processor unit	Lifecycle status	No longer for sale
Controller family	Advant Controller 110	ABB product category	Control Systems / Advant OCS / Advant Controller 110 / Central Units
Processor	MC68000

Engineering boundary

Retain PM632 and 3BSE005831R1 as one item identity. Back up the controller application and installed hardware configuration before replacing the processor unit.

Applications and Engineering FAQ

APPLICATION	ENGINEERING CONTEXT
Advant Controller 110 CPU service	Maintains the processor function in an installed Advant Controller 110.
Legacy controller replacement	Replaces the exact PM632 item after application and hardware records are secured.
Battery maintenance	Uses the documented replacement kit under the approved controller procedure.
Controller recommissioning	Restores the approved application and verifies connected control functions.

Model-Specific FAQ - Part 1

QUESTION	ANSWER
What is ABB PM632 3BSE005831R1?	It is the processor unit for an Advant Controller 110.
Which processor is used in ABB PM632 3BSE005831R1?	ABB identifies an MC68000 processor.

FAQ, Related Products and Sources

QUESTION	ANSWER
What is the clock frequency of ABB PM632 3BSE005831R1?	The documented clock frequency is 16 MHz.
Which battery kit is listed for ABB PM632 3BSE005831R1?	ABB lists battery replacement kit GJR5146300R9.
What is the lifecycle status of ABB PM632 3BSE005831R1?	ABB identifies the item as no longer for sale.
Which controller family uses ABB PM632 3BSE005831R1?	It is cataloged under Advant Controller 110 central units.
What must be backed up before replacing ABB PM632 3BSE005831R1?	Back up the controller application, hardware configuration and communication settings.
What confirms ABB PM632 3BSE005831R1 commissioning?	Processor diagnostics, application execution, communication and affected I/O must match the approved record.
